# Wax Setting 3D Robot

YUBAO
首饰器材专家 · 1993

## Product Feature

- Come with a customized molding clay which can be quickyly molded, and durable to use
- Available for PP0 - PP30 diamond
- Cater to 360- degree curved surface wax inlay process on the market
- Equipped with vision-assisted calibration for precise identification
- Speed up to 6000-10000 pcs/hr
- Easy operation, quick to get started, automatic needle alignment, high precision
- Supports file copy and multi-machine sharing,fast batch production

## Product Description

Specially designed for use in jewelry wax setting. It is an excellent choice for gold, silver, copper, stainless steel, etc. which need precise stone setting and diamond setting. The equipment is equipped with automatic needle alignment function, which makes the operation easier, and the dispensing and suction drilling are completed on one machine to ensure the maximum production efficiency. Super large memory space, can store 9999 groups of files, convenient for reuse.

## Technical parameters

| Item Name | Wax Setting 3D Robot | Item No | YB-Z3T-LV-V3 |
|---|---|---|---|
| Stone setting speed | 6000-10000(pieces) per hour | Machine weight | 620kg |
| Accuracy | ±0. 05mm | Operating system | Win7-64-bit |
| Rated power | 2KW | Power | AC220V/50HZ |
| Transmission mode | Hiwin/Pmi precision guideway +TBI wire rod | Size | 1100mm*950mm*1300mm |
| Bed structure | Gantry bridge structure | Drilling head | 3 suction mouth |
| Drive system | High precision servo drive | Control system | Independent development system |
| Working air pressure | 80psi(0.6Mpa) | X/Y/Z effective stroke | 420/310/92mm |
